← **Quick change
shank to fit
standard drill
chucks or
quick change
chucks**

**EXTEND AND
LOCK FOR
DRIVING HEX
HEAD SCREWS**

← **Case
hardened
socket**

SAFETY AND EFFICIENCY IN DRILLING AND DRIVING SHEET METAL SCREWS

Current tools for drilling and driving sheet metal screws have two or three separate pieces that are prone to getting lost or falling on workers below.

Problem solved. The Sheet Metal Installation Tool is conveniently slid and locked out of the way of the drill. No need to remove from driver, creating a much safer environment for workers below. Less time and money is spent on replacing lost tools.

Usage:

- Roof and siding steel
- Electrical and plumbing hangers
- HVAC sheet metal and duct work

TWO SIZES 1/4" and 5/16"
